

# Zero-Ohm Systems Signs Deal with Shoreview Distribution in the USA

Montreal, Quebec, Canada, November 20, 2019

We are pleased to announce the signing of an exclusive agreement with Shoreview Distribution (Foxboro, Mass) to expand our global sales network. *Shoreview has a very impressive line card including names like Sony, Denon, Pioneer DJ, TOA, Bosch, Ross Video and Yamaha to name a few.* Together we will deliver a message loud and clear. Why continue to sacrifice sound quality on major installs? Zero-Ohm Systems provides the simplicity of 70V installations while simultaneously delivering Low-Z sound. Our plug-n-play design essentially eliminates the need for transformers offering the clear benefits of full-range sound with impressive cost saving opportunities.

Shoreview Distribution is excited to welcome Zero-Ohm Systems to the family, and expect great things to come from this new partnership. "This is a revolutionary product that makes the 70V world a thing of the past," said Luke Furr, President of Shoreview Distribution.

"When promoting a disruptive technology, it is vital to build a network with the right strategic partners. However, after meeting with Luke Furr, and his national sales team, we were also impressed with the vision at the top and the outside the box thinking from key members. Our products provide consultants, integrators and installers with flexible options to win more business. With Shoreview spreading the word we have the right crew to deliver the core message to key decision-makers ready to challenge the status quo and deliver valuable benefits to clients." *George Dracopoulos, Co-Founder of Zero-Ohm Systems.*

## About Shoreview Distribution

Shoreview Distribution is a Massachusetts-based B2B distributor focused on Professional Audio and Video Equipment, carrying over 15,000 products from the top manufacturers in the industry.

## About ZOHMS Inc.

Zero-Ohm Systems is a global manufacturer of a unique award-winning patented technology. Best of Show Distinction at ISE 2020; Best New Product Technology (Innovations Showcase) InfoComm 2017.

Our passive devices interconnect between any amplifier and loudspeakers without worrying about speaker loads, impedance and long cables runs. Forget the limits of traditional systems. You can now connect 20-40 speakers or more in parallel to one amplifier without the use of transformers. Until now, the ability to connect multiple speakers in parallel was confronted by the issue of operating the amplifier at a safe impedance. Although there are amplifiers that operate at 4 ohms and 2 ohms safely, any effort to drive them below the rated resistance load led to device failure. With this revolutionary invention, the rules have changed! Zohms products are ideal for major installations like hotels, shopping malls, theme parks, stadiums, bars, cinemas, reception halls, cruise ships, restaurants, airports, and more. If you would like more information or if you are interested in representing Zero-Ohm in your territory, visit [www.zohms.com](http://www.zohms.com) and/or send an email to [info@zohms.com](mailto:info@zohms.com).
