(per channel/4 channels)

**2K<sup>4</sup>**  
**RENEGADE**  
SERIES

## SPECIFICATIONS

**ZERO-OHM** System is a passive device that interconnects between any amplifier and multiple loudspeakers without the concerns of amplifier speaker loads, impedance and extremely long cable runs.

This Patented Design **eliminates** the need for 70V-100V transformer products.

**Multiple loudspeakers** can be wired in a parallel connection to impedances below one (1) Ohm.

## FEATURES

- Zero (0) Ohm functionality
- No Transformers required
- Multiple loudspeakers can be connected in parallel
- Any Speaker impedance can be used: 2/4/8/16 Ohm
- Uniform power distribution over long distance cable runs
- Full range frequency response
- Identical Output Phase relationship with all Power Amplifiers
