

Zero-Ohm Systems Names Dynamic UK Distributor

Montreal, Canada, April 2nd, 2021

We are excited to announce our exclusive distributor in the United Kingdom. Zero-Ohm Systems is a disruptive technology and to truly impact a market known for breaking innovative music, and pushing the limits, we needed a distributor that was not afraid to break old stuffy rules! Zero-Ohm Systems challenges the status quo and provides a true alternative to the traditional sound limitations of the standard 70V/100V solutions. Not a single installer wants to limit their client's sound experience

regardless of the setting. Everyone wants to deliver full range sound on every install! Until now, that was not feasible on large installs. For decades, standard industry sacrifices have been made. Well, now there is a clear choice that delivers value where tradition dictates sacrifice! The team at DizzyFish (Dizztribution) will be the local messengers spreading the good word on just how we are Transforming the Laws of Sound in the UK.

"We are delighted to bring zero-ohm into the family, as the exclusive UK distributor. When we set out to create a distribution network by installers for installers the product had to be used by us or really excite us, zero-ohm falls into both categories, we were excited by the technology and now spec it in our work.

The amazing thing for any domestic speaker manufacturer, integrator or distributor is that if you work with zero-ohm you open all the speakers you know and love to a commercial market... this is also huge for designers who now can blend a huge array of speakers into there design and not be dictated by harsh boxes.

We hope our relationship with zero-ohm goes on for many years as we are so stoked about an AV product of mystery legend equivalent to unicorn dust."

**Avril & Dave Wilson
Owners of DIZZYFISH Installations (Dizztribution)**

Zero-Ohm Systems provide the simplicity of 70V/100V solutions while simultaneously delivering all the preferred benefits of Low-Z. Our plug-n-play design essentially eliminates the need for transformers while offering the core customer benefit of full-range sound. The B2B installer is rewarded with simplified job execution and effortless scalability which leads directly to impressive time, cost, and labour-saving advantages on a large variety of jobs. We look forward to making great new inroads with this truly innovative fearless team.

About DIZZYFISH (Dizztribution)

DizzyFish has nearly a quarter of a century of experience in the AV industry and know that having a product that is awesome and that works is paramount. So, they created a company “by installers for installers.” They distribute products they use, know, and trust. All technology they use must provide excellent quality, be driven by awesome technology, and deliver excellent pricing for channel members. They strive to be a great company to work with. Go to shop.Dizzyfish.net to apply for a trade account in the UK.

About ZOHMS Inc.

Zero-Ohm Systems is a global manufacturer of a unique award-winning patented technology. Best of Show Distinction at ISE 2020; Best New Product Technology (Innovations Showcase) InfoComm 2017.

Our passive devices interconnect between any amplifier and loudspeakers without worrying about speaker loads, impedance and long cables runs. Forget the limits of traditional systems. You can now connect 20-40 speakers (or more) in parallel to one amplifier without the use of transformers. Until now, the ability to connect multiple speakers in parallel was confronted by the issue of operating the amplifier at a safe impedance. Although there are amplifiers that operate at 4 ohms and 2 ohms safely, any effort to drive them below the rated resistance load led to device failure. With this revolutionary invention, the rules have changed! Zohms products are ideal for major installations like hotels, shopping malls, theme parks, stadiums, bars, cinemas, reception halls, cruise ships, restaurants, airports, and more. If you would like more information or if you are interested in representing Zero-Ohm in your territory, visit www.zohms.com and/or send an email to info@zohms.com.
